

PROGRAMS supporting the book:

Tomasz P. ZIELIŃSKI

Starting Digital Signal Processing in Telecommunications Engineering A Laboratory-based Course

SPRINGER, 2020

BOOK CONTENTS

Lab 01: Signals
Lab 02: Signals
Lab 03: Transforms
Lab 04: DtFT and DFT
Lab 05: FFT
Lab 06: FFT Applications
Lab 07: Analog Filters
Lab 08: IIR Filters
Lab 09: FIR Filters
Lab 10: Resampling
Lab 11: Hilbert and Differentiation Filters
Lab 12: Adaptive Filters
Lab 13: Modern Frequency Analysis

Lab 14: Speech
Lab 15: Audio
Lab 16: Images

README

Lab 17: Software-define Radio Principles
Lab 18: FM – Frequency Modulation
Lab 19: AM - Amplitude Modulation
Lab 20: Single Carrier Principles
Lab 21: Single Carrier Receiver (RDS, TETRA)
Lab 22: Multi Carrier – (A)DSL
Lab 23: Multi Carrier - DAB
Lab 24: Multi Carrier – 4G/5G

ALL Programs without data
ALL extra DSP programs without data
Auxiliary programs
ALL Data without IQ
ALL Data IQ
